On motion of Mr. Ziegler, seconded by Mr. Kingsley F. Young and duly carried, the following permit was given to the Village of Palmyra to construct a water pipe line in the highway on easterly part of Foster Street Road for about 700 feet:

Permit under Section 80 of the Highway Law

Whereas Section 80 of the highway law provided that the Town Superintendent may, with the consent of the town board, upon the written application of any resident or taxpayer of his town or a corporation grant permission for an overhead or underground crossing or to lay and maintain drainage, sewer, and water pipes underground within the portion therein described of a town highway. If the highway is a state or county highway, such permission shall be granted with the consent of the County or District Superintendent instead of the Town Board. Permission shall not be granted for the laying and maintaining of such pipes under the traveled part of the highway except across the same for the purpose of sewerage and draining swamps or other lands and supplying premises with water. Such permission shall be granted upon the condition that such pipes and hydrants or crossing shall be so laid, set, or constructed as not to interrupt or interfere with public travel upon the highway. Upon further condition that the applicant will replace the earth removed and leave the highway in all respects in as good condition as before the laying of said pipes or construction of such crossings, and that such applicant will keep such pipes and hydrants or crossings in repair and save the town harmless from all damages which may accrue by reason of their location in the highway, and that upon notice of the Town Superintendent, the applicant will make repairs required for the protection or preservation of the highway. The permit of the Town Superintendent, with the consent of the Town Board, County, or District Superintendent, and the acceptance of the applicant shall be executed in duplicate, one of which shall be filed in the Town

Clerk's Office, and the other in the District or County Superintendent's Office. Should the applicant shall fail to make any of the repairs required to be made under the permit, they may be made by the Town Superintendent at the expense of the applicant. Such expenses shall be a lien prior to any other lien upon the land benefited by the use of the highway for such pipes, hydrants, or structures. The Town Superintendent may revoke such permit upon the applicant's failure to comply with any of the conditions contained therein.

Whereas a certain highway known as the southeasterly section of Foster Street is on the town highway system, and whereas the Village of Palmyra water Department, whose address is Palmyra, NY, requests permission to excavate a trench 5½ in depth and lay a 12" water main for a distance of about 700 feet, as per sketch or map attached.

Now therefore permission is hereby granted to said _____ to do work upon the following conditions: Conditions and Restrictions

This permit shall not be assigned or transferred with the written consent of the Town Superintendent of Highways.

The work authorized by this permit shall be performed under the supervision and to the satisfaction of the Town Superintendent of Highways. Particular attention is called to the necessity of thoroughly compacting the backfill, which will be required by the Town superintendent. The Town Superintendent of Highways shall be given one week's notice by said applicant of the date when it intends to begin work authorized by this permit, and prompt notice of its completion.

The said applicant hereby agrees to hold the state, county, and town harmless on account of damages of any kind, which may arise during the progress of the work authorized by this permit or by reason thereof. Applicant certifies all persons concerned with actual work under this permit are duly covered by Workmen's Compensation Insurance, and the state, county, and town shall be held harmless on account thereof.

The Town Superintendent of Highways reserves the right to at any time revoke or annul this permit, should the said applicant fail to comply with the terms and conditions upon which it is granted. The applicant agrees to pay all necessary expenses incident to supervision and inspection by reason of the granting of such permit as certified by the Town Superintendent of Highways. Such payment is to be made in ten days from rendering of the certified account. Work under the permit is to be commenced within thirty days from date of permit and continued in an expeditious manner. The applicant shall submit a detailed plan of the structure to be built with description of proposed method of construction.

It is understood that should future changes in the highway construction or use shall make necessary changes in the proposed work covered by this application and permit, the applicant shall, on reasonable notice from the Town superintendent, make such necessary changes at this own expense within the time so specified in notice.

Traffic shall be maintained by the applicant on this section of the highway while the work is in progress and until final completion.

Certified Check

A bond in the sum of \$ payable to the Supervisor of the Town of is to be deposited as security that the highway will be restored to its original condition where disturbed at expense of applicant as soon as the work has been completed. The said Town Superintendent of Highways is hereby authorized to expend all or much of such deposit as may be necessary for that purpose, should said applicant neglect or refuse to perform the work.

Special Conditions

The excavated limits of the 5½-foot trench shall be dug at least 3 feet from the edge of the existing gravel road and existing shoulders of said gravel road shall be restored in a good and workmanlike manner. In consideration of granting this permit, the undersigned accepts it subject to conditions described.
